PROJECT WORK

Smart Healthcare: Liver Segmentation Image Analysis Using AI | [GitHub Link](#)

- Developed a deep learning-based liver segmentation system using **MONAI** and **PyTorch**, leveraging U-Net architecture for medical image analysis.
- Preprocessed and trained on CT/MRI scan datasets, applying MONAI transforms for high-precision segmentation tasks.

WanderVault | React [GitHub Link](#)

- Developed a MERN stack application allowing users to upload images and share the stories behind them, creating a unique digital archive.
- Designed and implemented RESTful APIs for seamless image and story management, ensuring optimal performance and scalability.
- Integrated a user-friendly interface with real-time updates to provide an engaging platform for exploring and sharing memories.
